

FIGURING OUT HOW MUCH SEED YOU'LL NEED

- 1) Find out how many square feet you need to seed
(Length x Width)

- 2) Take the number of square feet and divide that by 1000.

- 3) Take that answer and multiply it by 5. This number represents how many pounds of seed you'll need for your area.

FERTILIZER

PRODUCTS

PROFESSIONAL TURF FERTILIZER PROGRAM

STEP 1: Professional Crabgrass Control Fertilizer

19-0-6 Slow release (25% PCSCU) with 0.125% Dimension. 50 LB bag covers 12,500 Sq.Ft.

Best to apply: Early April through end of April

*You may also apply 12-12-12 Starter Fertilizer if you are starting a new lawn

STEP 2: Professional Broadleaf Weed Control Fertilizer

20-0-8 Slow release (25% PCSCU) with 0.675% Q-3 Herbicide. 50 LB bag covers 12,500 Sq.Ft.

Best to apply: Mid May through June 1st. Q-3 is a contact herbicide. It is best to apply after a rain or dew when area is wet. Apply when weeds are present. There is no residual effect. It will only kill weeds with which it comes in contact.

STEP 3&4: Straight Feed Professional Turf Fertilizer
25-0-8 (25% PCSCU) 1% FE. No chemicals, just fertilizer. 50 LB Bag covers 12,500 Sq.Ft.

Best to apply: Mid July (preferably during cool spell) and late August.

STEP 5: Winterizer
15-0-30 Fertilizer
50 LB bag covers 12,500 Sq.Ft.

Best to apply: May be applied on established turf as a winterizer around the end of October.
