OUTDOOR LIVING, REDEFINED.

Step outside your home and imagine the possibilities. Do you picture a stunning patio full of friends enjoying a BBQ? Or maybe it's a simple yet sophisticated walkway from the front door through the garden. With Borgert's wide range of colors, textures and sizes, you can create beautiful outdoor living spaces to enjoy for decades.

For nearly 100 years, Borgert has fulfilled the artistic vision of homeowners and designers with the most beautiful yet durable pavers, slabs and walls available. With Borgert, you can redefine your lifestyle with outdoor kitchens and living rooms, patios and terraces, walkways and driveways. You can live the outdoor life you imagine in beauty that lasts a lifetime.

Borgert is known not just for style and beauty, but also for quality and superiority. To ensure that our products have the longevity you want and need, as the only manufacturer in the Midwest, we use granite aggregates. Why Granite? Granite is the hardest aggregate next to diamonds. It does not absorb moisture making the paver durable in freeze/thaw. It does not absorb the color pigments making for a more vibrant color throughout the lifetime of the pavement. When you crush granite, the physical characteristics make it angular creating a stronger bond with the cement and color that are a part of the components of the paver.

WHAT'S INSIDE MATTERS...
Natural. Hardest. Granite... that is
what makes our products the strongest.

Your vision, brought to life.

BORGERT PRODUCTS

COMES WITH A PEDIGREE.

Family owned and operated, Borgert Concrete Products, Inc. was established in 1923 by Lawrence A. Borgert in East St. Cloud, MN. In 1953, Lawrence's son, Kenneth J. Borgert, took over the business and relocated it to its current location in St. Joseph. As sole owner of Borgert Products, since 2006, I am proud to uphold the same values and traditions of quality products and service unmatched in the industry just as my Grandfather and Father did. In 96 years, we have survived some challenging times which has made us a strong leader in our industry today. We started out manufacturing block and precast and have evolved into Interlocking Concrete Paving Stones, Retaining Walls and Slabs, with 2019 marking the 42 year anniversary of manufacturing paving stones. Thanks to the creativity of our people and our engineering, we continue to design new and improved products, providing our customers better selections to build their dream landscapes.

Ultimately, our Company's success is due to the hardworking team of people at Borgert Products. We are fortunate to have skilled and knowledgeable people who work hard to produce quality products, with impeccable service and commitment to our customers. In the 96 years that Borgert has been in business, many changes have occurred and I know that the founders of our Company would be as proud as I am for where we are today.

A handwritten signature in cursive script that reads 'Susan M. Borgert'.

TRADITIONAL PAVING STONES

Holland Stone™

Cobble Series™

Bavaria II

Vavel II™

Whether you're dreaming of a new patio, an outdoor living room or a simple walkway, we can help you create it with style. Borgert's paving stones come in a wide range of textures, colors, shapes and styles. Imagine your outdoor kitchen defined by a timeless herringbone design or a large poolside patio made of an intricate pattern of squares and rectangles in a variety of colors. Whatever outdoor space you're creating, Borgert has the paving stones you need to create a lasting impression.

Your vision, brought to life.

Calling to mind the distinctive look and feel of European cobblestones, the Borgert Cobble Series is a beautiful reminder of time since past. The series consists of several different sizes and a variety of colors, making the number of potential pattern designs virtually unlimited. You can add interest to your Cobble project by adding circles. The packaging of the Cobble Circle makes it easy to order just what you need to create circles and without any cutting! You can create circles of any diameter, or even a half circle. The design possibilities are endless. It is this flexibility which has made the Cobble Series one of the most popular paving systems.

 Chamois & Charcoal.

Going back to the Stone Age when people's ideas of building were somewhat limited, Borgert Products created a simple, yet durable eye-catching system. Our tumbling process creates a sculpted appearance to each paver and our carefully formulated new colors will take you back to Medieval times. In addition, this line comes in sizes configured to create full circles, half circles or arches. A unique feature of our circle stones is that one side has a more textured edge and the other is softened, use whichever fits your taste. This system protects your investment by ensuring performance in its simplicity.

COLOR SELECTION

SELECTING COLORS - Colors are shown as accurately as possible. Due to the nature of the product, color preference and variables in print reproduction, colors will not match exactly. Make final color selection from actual samples.

For best blend results always select from multiple cubes.

CHOOSING BLENDS - Borgert manufactures pavers and walls in various blend colors that consist of either two or three colors. When choosing a blend, it is important to keep in mind that some of the pavers will be dominant in one of the colors and some will be a combination of the colors that are in that particular blend. (i.e., Minnesota River is a blend consisting of Chamois, Brown & Charcoal - some pavers will be entirely Chamois, some pavers will be entirely Brown, some will be entirely Charcoal, and others will be a combination of the two or three of these colors.)

RESOURCE GUIDE - for installation, packaging and more design pattern options request Borgert's resource guide.

Colors are shown as accurately as possible. Due to the nature of the product, color preference and variables in print reproduction, colors will not match exactly. Make final color selection from actual samples.

THE BEST SYSTEM. THE BEST VALUE.

DURABILITY

An interlocking concrete pavement (ICP) is far superior to any other pavement. This is because paver ASTM Specification is 8,000 psi and only up to 5% absorption, which makes for an extremely durable wearing course that is long lasting. Borgert consistently exceeds these standards. We have supplied millions of square feet of concrete pavers that have been in place for over 30 years with minimal maintenance depending on the application. A very important aspect of interlocking concrete pavement is that it is a flexible pavement system and is resistant to damage due to freezing and thawing cycles, which is very important in our markets. Another advantage is that these pavements can handle extremely heavy loads making them suitable for applications from walkways/plazas to airport taxiways. Another paver advantage is that color and texture can be added to any paved area without sacrificing durability. No other pavement gives you all of this.

FLEXIBLE SYSTEM

What makes Borgert's interlocking paving stone system flexible is the construction of the pavement. A proper base is required and is essential no matter what type of pavement you are building. The only thing different with interlocking concrete paving stones is that you need an edge restraint and one-inch setting bed to set the pavers on, then you compact the pavers into the sand, which creates the initial "lock" of the system. The pavers work with each other, so when a vehicle drives on the pavement the "interlock" created by the sand joint allows the weight to be distributed throughout the entire pavement not just at the point of the wheel load. The pavers will roll with ground movement vs. differential movement and often bridges depressions underneath the system. There are no unsightly cracks and holes as with concrete or asphalt. You see an Interlocking Concrete Paving Stone Pavement is built intentionally with cracks - the sand joint between the pavers. Also important... pavers are skid resistant due to the nature of the joints and surface.

QUALITY PRODUCT

Borgert pavers have color throughout, so scrapes and abusive damage are masked because the color is through the whole paver. This also makes for a more durable wearing surface because the granite is throughout. Why Granite? Granite is the hardest aggregate next to diamonds. It does not absorb moisture, making the paver more durable in freeze/thaw due to deicing chemicals. It does not absorb the color pigments making for a more vibrant color throughout the lifetime of the pavement. The granite is dark in color so it blends in better as the pavement ages. It is angular which creates a better bond with the cement in the unit. It's not just about the paver - it's about the system. Building the system with Borgert's high quality concrete paving stones will give you a pavement to enjoy for years to come.

BORGERT TECHNICAL SCHOOL

In support of our industry, Borgert created the Borgert Technical School (BTS) Installer Certification Course. The two day course includes hands-on training which makes it the best technical school in North America. We offer classes in both Interlocking Concrete Pavement (ICP) and Permeable Interlocking Concrete Pavement (PICP) installation for residential applications. The contractors who attend the course(s) are given a test which is administered by a third party. All passing attendees are given a certificate and listed on our website. Go to borgertproducts.com for the current listing.

WHAT YOU SHOULD KNOW ABOUT INTERLOCKING CONCRETE PAVEMENT

MAINTAIN

Borgert pavers provide a durable yet decorative pavement - two big pluses. Like anything that is for outdoor use, they require a little care and maintenance. Clean patios or driveways with a mild soap in the fall and spring. You can also use cleaners specifically made for concrete pavers. Check with Borgert Products or your hardscape supplier for what products they recommend.

EFFLORESCENCE

A white haze known as efflorescence is a natural occurring process in concrete. Technically known as calcium hydroxide, it can come from a number of sources and appears as a white film when carried to the surface by moisture. It may appear randomly or in certain areas and is more pronounced on darker colors. The good news is efflorescence does not affect longevity or structural integrity of the pavers. Although unsightly, in many cases it is scoured off during installation when compacting the pavers. It can also be removed using specialty cleaners, made for interlocking concrete paving stones. Otherwise, it will typically lessen or dissipate, over time with rain, snow and wear. Because efflorescence can be a natural by-product of cement hydration, its presence is not indicative of a flawed or defective product. Efflorescence cannot be prevented, so as with all other manufacturers, this condition is not a warranty issue.

POLYMERIC HAZE

Interlocking concrete pavement (ICP) does not require a jointing material other than sand. Poly haze can happen if it is not used properly and should not be confused with efflorescence. Since the use of poly sand is not an installation requirement, Borgert Products accepts no responsibility in the event of hazing. We suggest you contact your contractor or the manufacturer of the polymeric sand for their suggestions concerning their products.

SNOW, ICE AND DEICERS

Our pavers and walls are more than beautiful. They have the durability to withstand the harsh winters of the Midwest and, when properly installed, snow removal is no problem...either by shovel, snow blower or plow.

Our pavers have a surface that is slip and skid resistant even when wet. Ice, on the other hand, can be slippery and common sense should be used to prevent slips and falls. We recommend sand for traction, as it can be applied liberally and as needed. Clean, untreated sand has no corrosive effect on concrete pavers and it can be swept into the paver joints or removed by conventional sweeping or vacuuming.

Concrete pavers are robust in resisting the effects of deicing chemicals. We have manufactured pavers that have been exposed to salt for over 40 years! Nevertheless, deicing chemicals can be harmful to the pavers. If using a deicer, the ICPI recommends a NaCl sodium chloride. We recommend against the use of other types, including products that contain a blend of chemicals. Pavers exposed to any deicing chemicals must be properly cleaned and maintained. We recommend cleaners designed for concrete paving stones. Check with Borgert Products or your hardscape supplier for what product they recommend.

For industry information concerning maintenance, efflorescence, deicing chemicals and installation guidelines visit www.icpi.org.

RESIDENTIAL WARRANTY

LIMITED WARRANTY FOR INTERLOCKING CONCRETE PAVERS IN RESIDENTIAL APPLICATIONS AND PERMEABLE CONCRETE PAVERS IN RESIDENTIAL APPLICATIONS.

Borgert Products, Inc. is pleased to provide this lifetime warranty on the structural integrity of its paving stones to the original purchaser for residential applications. A residential application is limited to a driveway, patio or similar use for a single-family residence. The original sales receipt is required for all warranty claims. Borgert Products has a minimum of one year from the time it receives notice to make a determination on a warranty claim. If Borgert Products approves the claim, it may at its option either replace the affected pavers or refund the original purchase price of the pavers to the original purchaser. Color matching is not guaranteed and replacement labor for removal or reinstallation is not included in this warranty. This warranty does not cover normal wear and tear, accidental damage or damage caused by improper installation or abuse such as chipping, breakage, overloading, uneven bedding, abrasion, etc. Efflorescence is not a manufacturing defect and is not covered by this warranty. This warranty is also void if the pavers are not installed using installation methods approved by Borgert Products, Inc., or if the pavers are damaged due to failure to clean and maintain them properly. Please see www.icpi.org for more information regarding installation and maintenance of pavers. Borgert Products, Inc. shall not be liable for incidental, punitive, exemplary, indirect or consequential damages, or lost profits arising under or relating to the purchase and use of its products. This is the only warranty provided by Borgert Products, Inc. Borgert Products, Inc. disclaims all other warranties, expressed or implied.

Your vision, brought to life.
