

Sunny 100

Product Description:

This is a mixture of elite and improved Kentucky bluegrass, fine-leaved ryegrass, and creeping red fescue cultivars. This formulation will demonstrate quick emergence, excellent density under normal and low fertility situations. It will exhibit a deep green color pleasing to the eye. It is well adapted to different soil types and conditions. This formulation has limited shade tolerance. It is our most popular mix for residential and commercial lawns. The formulation of species is a standard in the industry.

Recommended Use:

This versatile mix is recommended for residential and commercial lawns with normal maintenance management practices.

Management at Establishment:

Keep the top ¼" of soil moist for 8 to 10 weeks.

Management After Establishment:

A high quality lawn can be maintained with fertilizer applications in early spring, late spring, summer, and fall. Suggested mowing height is 2 to 3 inches, but not less than 1 ½ inches.

Seeding Rate at Establishment:

6 to 7 pounds per 1,000 sq. ft. (250 pounds per acre)

Seeding Rate After Establishment:

Overseed at half the establishment rate, i.e. 2 ½ to 3 pounds per 1,000 sq. ft. (112 pounds per acre)

Approximate Seeds per Pound: 1,375,000

Ingredients:

By Weight	By Seed Count	Product
10%	17%	Concerto Kentucky Bluegrass
